ACADEMIC PROJECT

Mini project :

Actually my mini project is based on the .net framework. In the next my mini project name is “**E-Bulleten Board**”. In this .net is totally based on the three applications, first one console application, windows application, web application. In my project is based up on the web based application.

Duration :May/18/2011-June/30/2011(**45** Days)

Software Requirements: Microsoft Visual Studio2008, SQL Server 2008

Description:

This system acts as standard interface between the clients and all the banks. By using this portal any client who maintain accounts in various banks can directly log on to multi banking System interface and make any kind of transaction. Uses this project I know very well of the various banking transactions and check the account details. I think this project very useful to the others.

Main project :

My project name is “**Random cast An Energy Efficient Communication Scheme for Mobile ADHOC Networks**”. This Project also based up on the .net framework and this is based web based project.

AI (Artificial intelligence),it is the science and engineering of making intelligent computer programs. It is related similar task of using computers to understand human intelligence.
