### Professional Summary

- Overall 2 years 11 months of experience in Software Development on Microsoft .Net Technologies C#, ASP.Net, WCF, WPF, Windows Forms, LINQ and ASP.NET MVC including MS SQL Server 2008 R2/12 and Oracle 10g/11.2g databases.
- 2 years 11 months of experience in Agile methodology in Media & Entertainment domain.
- Created various Proof of Concepts in WPF and windows service.
- Very good analytical and problem solving skills. Ability to analyze problems and find innovative solutions.
- Experience in managing software development, customizations, enhancements and support and worked in all phases of SDLC.

### Technical Expertise

Programming Languages : C#  
Dot Net Technologies : WCF, WPF, ASP.Net, Web Services, LINQ, Windows Forms and ASP.NET MVC  
Web Related : Java Script, HTML  
Web & Application Servers : IIS 6.0, 7.0  
Databases : Microsoft SQL Server 2008 R2/2012, Oracle 10g/11.2g  
Operating Systems : Windows 7/8, Linux  
Source Control : TFS

### Experience Summary

- Working as a **.Net Developer** with **Nihilent Technologies Ltd, Pune** since Aug 2013 to till date.

### Academics

- Completed **Bachelor of Technology** (B. Tech.) in **Computer Science Engineering** from Vishwakarma Institute of Technology, Pune Maharashtra.

Passing Year	Qualification	College Name	Percentage
2009-2013	B.Tech(CSE)	VIT (Pune)	7.68 (CPI)
2008-2009	H.S.C	Mahatma Gandhi Mahavidyalaya, Ahmedpur	92.00%
2006-2007	S.S.C	Bharat Madhyamik School, Risod	86.00%

### Professional Experience

**Project Title** : IBS  
**Client Name** : MultiChoice  
**Role** : Developer  
**Technology** : WCF, ASP.Net, Web Services, BIZTALK, Windows Forms, Java script, Oracle11.2g, SQL 2008 R2 etc.  
**Duration** : April 2015 to Till Date  
**Description** :

IBS Web v54 is a web based application that maintains information about the customer's Core Billing for Real-time Payment for automated service provisioning, DSTV Channels partnership with a Telecommunications company, and a Balanced Scorecard implementation for Strategy Execution.

**Responsibilities** :

- Responsible for analysis, design, implementation of code and database also for build release of IBS and SMA applications and fixed and supported for BizTalk related problems.
- In this project I have worked on web application and windows forms application for number of CRs and written Oracle script solution for new change requests.

- Involved in fixing integration and production issues.
- Involved in Client Communication and requirements analysis process and analysis of end to end business process flow.

---

**Project Title** : **Analogue switch off in Africa**  
**Client Name** : MultiChoice  
**Role** : Developer  
**Technology** : C#.net, WPF, Windows Service, Oracle10g, SQL Server 2008 R2/ 2012 etc.  
**Duration** : Aug 2013 to March 2015

**Description** :  
The scope of this project is to develop a WPF application which will scan the decoder and will extend the scanning limit by enabling to scan Pallet and Carton.

Developed a service which will get the data from MultiChoice to the client, Developed a console to get data from IBS oracle database to SQL Database also Developed windows service which reads data from file and update in the database and to handle customer's number which will going to increase from 80M to 1B.

**Responsibilities** :  

- Involved in analysis, design and development from the beginning of the project.
- Responsible for analysis, design, implementation of code and database also for an application hosting and documentation of the application flow.
- Involved in fixing integration and production issues.

#### Proof of Concepts

**Title** : **GetDataService and MoveFileService**  
**Technical Environment** : Windows Service, C#.NET. , SQL Server 2008 R2  
**Role** : Developer  
**Business Objectives:**  
This is a Proof of Concept developed to read file dropped on shared location and verify the format and move this validated file to another shared location to update data in the database.  
This windows services will be triggered after every 5sec to read and update data in the database.

---

**Title** : **WPF Application Patch Upgrade** (install multiple patches)  
**Technical Environment** : WPF, WCF, C#.NET., WCF  
**Role** : Developer  
**Business Objectives:**  
This POC is developed to upgrade the WPF Windows application, using patch (.MSP file). As .MSP file is difference between two versions of applications, it is very small size to download and update the applications without reinstallation.  
If someone wants to update application later on there might be chances of multiple release, so application capable enough to install multiple patches at the same time automatically.

#### Additional Experience and Awards

- Finalist in Programmers Marathon conducted by Hitachi Consulting in April-13
- Cognizant Certified Student for IT foundation skills.
