ACADEMIC PROJECT:

Anti-ulcer activity of Ethanolic extract of Coriandrum sativum linn.. in albino rats.

Abstract: This study was designed to determine the anti-ulcer effect of 70% ethanolic extract of whole plant of Coriandrum sativum linn.. in pylorus ligated, Indomethacin induced and Cold restraint stress induced gastric ulcer models in rats. Two doses (200mg/kg & 400mg/kg) were selected for the study. Treatment with the extract have shown dose dependent decrease in ulcer index in all the experimental models of ulcers. The prior administration of extract also reduced the total acidity, free acidity and increase in the pH. However the gastric volume was also reduced. The 70% ethanolic extract of the plant possess anti-ulcer properties. The anti-ulcer properties of the extract may be attributed to the presence of flavonoids in it.
