**ACADEMIC PROJECT****DAILY PROGRESS REPORT MANAGER (DPR)**

Language Used – PHP, MySQL.

**OBJECTIVE**

The project's objective was to computerize the process of filling daily progress report by our faculty staff through the LAN of our campus. Earlier this process was completely manual, hard copies were submitted to respective HOD's. Complete project was browser based.

**ROLE**

My role in this project was to manage all the tables and data related work.

**RESULT**

The outcome of our project was that all the paper work which was done previously, was now computerized. Our faculties now don't need to go to respective HOD's cabin, they can now just login in their accounts and fill the columns from anywhere in the campus.

---

**OTHER PROJECTS****DOGLOVERS.COM****LANGUAGES USED**

PYTHON, DJANGO, CSS, BOOTSTRAP

**OBJECTIVE**

The objective of the project was to make a dynamic website which will have some features like – Like Button, Comment, User Signup, etc.

**ROLE**

My role in the project was both of developer and designer. This complete website is made by me only, from scratch to completion.
