

PRANJUL ARORA

811, Sector-9, Urban Estate, Ambala City, Haryana-134003, India, Ph-+91-9729063123

Email: arora.pranjul@gmail.com

Career Objective:

To secure a position in a well established organization with a stable environment that will lead to long lasting relationship in the field of pharmacovigilance which leverages my skills and achievements.

Work experience:

17-Jun-2013 till present: Pharmacovigilance Analyst in Quantum Solutions India (now Parexel), Chandigarh, India.

Summary of experience:

More than 03 years of experience in management of Individual Case Safety Reports (ICSRs) of all case types (spontaneous, clinical studies, solicited programmes and literature articles) which include triage, registration, duplicate search, data entry, MedDra coding and data validation. Also gained experience as French translator which involved the translation of the source documents (mainly the CIOMS form from the French health authority) to English language.

Professional experience:

- Management of Individual Case Safety Reports (ICSRs) of all case types (spontaneous, clinical studies and solicited programmes) which included triage, data entry in the safety databases (such as AWARE, Argus and ArisG) and data validation.
- Experienced in review and validity assessment of literature abstracts and full articles, identifying events for coding, query identification and tracking. Additionally, experienced in handling cases involving medical devices
- Experienced in MedDRA coding in accordance with “MedDRA Term Selection: Points to Consider”
- Performed quality checks of ICSR to ensure high quality of the safety reports in accordance with the client SOPs and regulatory requirements
- Managed the compliance queries with the primary responsibility of informing the team about the cases approaching the due timelines.
- Worked as French translator involving the translations of the French source documents (mainly the CIOMS form from the French health authority) to English language.
- Had been a part of the project involving the data migration between the safety databases.
