HEADLINE

Vice President ► Project Management & Development, Diversification & Expansion, Techno Commercial Operations, Project Governance - Civil Industry

Strategic Management ► Driving Organization's Transformation, Performance Improvement & Increased Productivity

SUMMARY

Bring to the table over 25 years of rich experience in diverse areas encompassing **Strategic Project Management, Construction Operations, Vendor Management & Development, Global Procurement, Client Relationship Management, Infrastructure Management, Value Engineering, System Designing, Contract Administration and Team Management**. I have extensive experience in Building Works, Irrigation Works, Road Works, Highways SH NH Express way, Ring Road, UGD Urban Township, Airport, Air Force MES and Sewerage.

My unique approach is to **formulate the project methodology with micro-level planning and executing the project towards successful completion**. The intent is to inspect and analyze the proposed project and ensure that works are carried out to specific standards. **With keen techno-commercial acumen, my objective is to add value to the organization through my knowledge and learning ability**. I have demonstrated strengths in swiftly ramping up Construction Projects with competent cross-functional skills and ensuring on time deliverables within pre-set parameters.

With sound technical background, I always look forward to adopt and adapt to the new wave of technology for its day-to-day application. I have been providing technical leadership to Project Engineering and have motivated resources to perform to the fullest potential. I have expertise in project planning, scheduling & performing cost-benefit analysis. The outcome has resulted in accomplishing various **prestigious projects** within defined parameters.
