PROJECT UNDERTAKEN

1. **Organization:** Facilitykart India Pvt. Ltd. Feb 2015 to till date.

Project Title: FacilityKart.Com

Roles & Responsibilities: Developing policies, strategies and reporting on daily/weekly and monthly basis based upon customer's data.

Objective: Facilitykart is a start-up by IIT alumni, facilitating the hyperlocal marketplace of home need services. Became a part of the company since foundation date and contributed my expertise to developed policies and strategies based on my analytical interest to provide a better foundation for the business.

Upon my interest in data crunching and seeing start-ups as an ocean of opportunity for learning new things and meeting new challenges everyday, working round the clock with an aim to take this business to a newer height and making its presence among every household of the country.

- **Customer Trend Analysis:** Daily/Weekly/Monthly Analysis based on booking pattern, advertisement data & Web reviews.
- **Web Trend Analysis:** Web trend analysis on daily basis to form a better strategy and making decision for the financial distribution of advertisement based upon the area wise search volume of customer.
- **Customer Sentiment Analysis:** Analyzing the sentiment of our customer by summarizing their feedbacks, reviews and service ratings for the continuous improvement in service delivery.
- **Operational support:** Processing the cycle of customer's booking till the confirmation of service completion through the coordination with technical and servicemen team.

2. Organization: Leadtech Management Consulting Pvt. Ltd. July 2012 to Feb 2015.

Project Title: Voter Information Management System.

Roles & Responsibilities: As a team member, in association with this software, my responsibilities are to automate working of Database Analysis and Report.

Objective: This software system provides a fully customized solution in user-friendly form to political leaders to monitor progress as well as various general and specific problems in their constituencies. It provides tools for graphically analyzing election results and gives an intensive comparison of performance of the candidate over past elections. It allows provisions for day-to-day entry of issues and development works in an area so that the problems can be traced anytime to their exact origin and cause.

3. Project Title : Delhi GIS (DSSDI) project

Technologies: Microsoft Excel, Microsoft Access

Role : My responsible for data checking after data entry and delivery in MS excel format

Project Detail: DSSDI is Delhi State Spatial data Infrastructure. In this project, property survey is being conducted for Survey of India by Navyuga Spatial Technologies. After conducting door to door survey and collecting various attributes of all the properties of complete Delhi, the data will be mapped with actual physical maps and will be provided in a GIS based software for better urban development and management.

- Coding Macros in excel to create filters and Verify the forms after Data Entry.
- Check if all the forms entered and complete and correct, if not then verify from the field
