## PROJECT

PROJECT NAME	YEAR	DESCRIPTION
ANALYSIS OF LEAD-II ECG FOR CLASSIFICATION AND DETECTION OF HEART DEFECTS	2016-2017 (FINAL YEAR)	A research based project to classify and detect various heart defects using the lead II configuration using the ECG signal. We had to collect various databases from the hospitals and analyse the various features to figure what kind of a heart disease the person might be suffering or not. We used MATLAB for signal processing and worked with ECG machines and amplifiers and simulators.
HEART RATE VARIABILITY	2016(FINAL YEAR)	A Mini project to get a basic understanding of what different features to focus on while considering heart defects.
BURGLARS ALARM	2015-2016(THIRD YEAR)	A Mini project that helped us work with LDR and IC Timer 555.
