Diploma In Information Technology From NETTUR TECHNICAL TRAINING FOUNDATION in 2009-2012.

Significant Projects:

Project 1 :

Title : R2
Type : Windows Based Standalone Application
Environment : Java
Database : Oracle 11g
Role : PL/SQL Developer

Description:

R2 is enterprise business software for medium to large sized Rental companies. With its superior features, R2 seamlessly integrates with all aspects of the business from customer relationship management to accounting integration.

R2 goes beyond automation; helping rental and staging companies make better business decisions every day. Imagine the ability to track and analyze every bid that was lost. Calculate the cost savings if your sub-rentals could be negotiated well in advance,

instead of being scalped at the eleventh hour. Make buy-sell decisions based on insightful data instead of Guesswork and gut. With R2 you have the power to go beyond check-in/check-out, inventory tracking and invoices. <http://www.unibiz.com/r2/r2.html>

Roles & Responsibilities:

- ✓ Create triggers to enforce complex integrity constraints and for auditing purpose to fire when insert or update operations are carried out on a table.
 - ✓ Involved in Creating new, modifying various existing packages, Procedures, functions, triggers according to the new business needs.
 - ✓ Develop procedures and functions for administrative module and encapsulated into PL/SQL packages for data collection, deletion and updation with functional requirements in validation and verification process.
 - ✓ Extensive involvement in full life cycle of the product.
 - ✓ Design and develop the database tables.
 - ✓ Optimize SQL queries for better Performance, tune and perform code debugging.
 - ✓ Scrutinizing and developing the business validation constraints.
 - ✓ Developed PL/SQL programs to extract the data specific to customers, Employees.
-

Project 2 :

Title : INSIGHT
Type : Web-Based CRM Application
Environment : .NET framework 4.0, Silverlight
Database : Oracle 11g
Role : PL/SQL Developer

Description:

InSight is a web-based enterprise dashboard, report delivery system as well as a fully integrated CRM application. InSight incorporates complex data source in the form of Widgets, which can be viewed in Graphical Chart View or in Table View and also in Reports generated. With InSight CRM, users can store and manage information about many aspects of business such as Companies, Contacts, Business Opportunities, Tasks, Business Leads, and Appointments. InSight allows keeping track of your business while you are on move, by scheduling the information to be received in your Mail Box, Desktop or even as SMS on your mobile.

Roles & Responsibilities:

- ✓ Develop complex SQL queries including Sub queries, Analytical functions, Pseudo columns, Set operators and Recursive queries thorough out the project.
- ✓ Writing SQL queries, procedures, functions triggers, packages using PL/SQL.
- ✓ Involved and played a key role in resolving technical issues.
- ✓ Develop enforced data integrity by applying constraints to achieve quality of the data in the database.
- ✓ Integrated and developed package modules to assist the development process of frontend interface.
