PROJECTS

SUMMER INTERN, THE FINANCIAL DOCTORS   May 2016-June 2016

Worked on a project developing an innovative technical trading strategy and another on testing the company's existing trading strategies in Forex Markets

FINANCIAL MODELLING

Developed an advanced financial model for valuing Lupin in Excel. The model was completely built from scratch and has active controls and dashboards to change various factors and get the intrinsic value of the company. This model can be easily customized for any other Pharma company.

EQUITY RESEARCH - APPL

Did an extensive study into Apple's business and built a DCF model to find out the intrinsic value of the company. As part of the research, looked at different products contributing to the revenues and built a model to forecast the future sales required to sustain the current market price.
