MAJOR PROJECTS

Error Detection in Big Data On Cloud   Advisor – S.B.Jadhav, BVCOEW

Technology used: Hadoop, JAVA, My Sql .

To develop such a approach that will efficiently reduce time for detecting errors in big sensor data on cloud. If any error is found then it also involves error recovery & storing the data in original format. We need to develop such a approach that will efficiently reduce time for detecting errors in big sensor data on cloud. If any error is found then it also involves error recovery & storing the data in original format. According to the error type and features from scale-free network we have proposed a time-efficient strategy for detecting and locating errors in big data sets on cloud . The main aim is to reduce the time required to detect the errors and to provide a error free transmission of data.
