**Academic Project**

| Project Title | Library Management System Using RFID And Cloud | |
|---|---|---|
| **Duration** | 4 Months (2016) | |
| **Environment** | **O.S:** Ubuntu, Yocto | **Language :** ALC,HTML5,PHP |
| **Description** | The aim of the project is to develop an smart library for login and logout of student and faculty and also give user friendly interface to access their details. In this project we used INTEL GALILEO GEN 2, RFID and CLOUD and also for UI we used HTML, PHP, MySql. Whenever student or faculty enter the library has to scan there rfid card given to them, the details of login will be stored in MySql whenever the user or admin want to see the details they can go through UI. By using these technologies we reduced the paper work and administrator work. | |
